Description

mdellweg:

Seems like we are returning 'application/vnd.docker.distribution.manifest.v1+prettyjws; charset=utf-8' when asking for 'application/vnd.docker.distribution.manifest.v1+json'. Is this intended?

dkliban:

We probably shouldn't be doing that unless we are actually signing the manifest. Let's file a bug about it.

History

#1 - 07/20/2020 05:24 PM - ipanova@redhat.com

it is intended to return signed manifest. Unsigned manifests are undesirable and unsafe. The signature payload is happening here https://github.com/pulp/pulp_container/blob/996a8cd44317d7ee320414bd968c8f536860ab26/pulp_container/app/schema_convert.py#L209

We should close this issue.
