

Pulp - Issue #7196

pulpcore.app.response.OperationPostponedResponse docstring is slightly wrong (no 'task' field in response)

Description

The docstring is:

```
An HTTP response class for returning 202 and a spawned task.
```

This response object should be used by views that dispatch asynchronous tasks. The most common use case is for sync and publish operations. When JSON is requested, the response will look like the following::

```
{
  "pulp_href": "https://example.com/pulp/api/v3/tasks/adlfbk-bala-23k517-lslser",
  "task_id": "adlfbk-bala-23k517-lslser"
}
```

But the response is only the 'pulp_href':

```
{
  "task": "/pulp/api/v3/tasks/3f40df5c-985e-4817-a605-4e5fabb6ff7d/"
}
```
