

Pulp - Task #7229

publish plugin documentation at docs.pulpproject.org

07/28/2020 07:45 PM - dkliban@redhat.com

Platform Release:	Sprint:
Groomed: No	Quarter:
Sprint Candidate: No	

Description

We currently host 'pulpcore' documentation at the root of docs.pulpproject.org. We want to publish documentation for additional pulp plugins under that domain. We want each plugin to be stored in the directory corresponding to its name.

```
docs.pulpproject.org/pulpcore/  
docs.pulpproject.org/pulp_rpm/  
docs.pulpproject.org/pulp_file/  
docs.pulpproject.org/pulp_container/  
docs.pulpproject.org/pulp_deb/  
docs.pulpproject.org/pulp_gem/  
docs.pulpproject.org/pulp_npm/  
docs.pulpproject.org/pulp_maven/  
docs.pulpproject.org/pulp_python/  
docs.pulpproject.org/pulp_ansible/
```

The root of the domain should forward users to docs.pulpproject.org/pulpcore/.

Each plugin should use its own user (named the same as the directory). Each user should only have the ability to write to its plugin directory. Each plugin is going to use rsync (and a unique private key) to publish the documentation to its directory.

Here is a proposal: <https://github.com/pulp/pulp-infra-ansible/pull/9>

Please provide all the component<->SSH key associations so I can fill-in the Ansible rules with it.

The redirection is currently commented-out until the core is synced properly. Beware the username is going to change.

Once all the components sync properly I'll remove the old user and cleanup the vhost's top directory.

Tell me what you think about it.

#5 - 08/05/2020 07:42 AM - duck

I am not allowed to change the status of this issue to reflect it's now WIP, could someone do that please?

#6 - 08/18/2020 03:18 PM - dkliban@redhat.com

- Status changed from NEW to ASSIGNED

- Assignee set to duck

#7 - 08/19/2020 11:19 AM - duck

I updated the PR with all the keys and fixed E208 spotted by ansible-lint.

PR: <https://github.com/pulp/pulpcore/pull/875>

#12 - 08/31/2020 09:02 PM - duck

The core is published and old URLs are redirected.

Components are not yet synced, let's check this too.

I'd like to cleanup the old sync account, may I remove it now? As for the files in the root directory of the vhost, using the same exceptions as the redirection, I guess I can remove everything?

Also while looking at it I realized there is a `_sources` subdirectory;. If the goal of this link is to encourage people to contribute I would suggest linking to GH instead of embedding the sources.

You can remove the old `doc_builder` account. We are no longer using it.

You can remove everything from the root of `docs.pulpproject.org` vhost using the same exceptions as redirection.

Also while looking at it I realized there is a `_sources` subdirectory;. If the goal of this link is to encourage people to contribute I would suggest linking to GH instead of embedding the sources.

This gets generated when we build our docs. We don't ever point users to these files. We always tell users to submit docs changes via github.

#14 - 09/01/2020 05:45 AM - duck

I did the cleanup.

As for `_sources`, your doc builder, or the template used, creates a View page source link top-right on all pages.

PR: <https://github.com/pulp/pulpcore/pull/878>

#18 - 09/01/2020 09:26 PM - dkliban@redhat.com

- Status changed from POST to MODIFIED

I am setting this issue to MODIFIED because the pulpcore docs will now be published to the new location. If we find any issues with plugins, I will open a new ticket.

#19 - 09/01/2020 09:27 PM - dkliban@redhat.com

- Sprint/Milestone set to 3.6.1

#20 - 09/01/2020 10:52 PM - pulpbot

- Status changed from MODIFIED to CLOSED - CURRENTRELEASE

#21 - 09/16/2020 02:27 PM - dkliban@redhat.com

- Status changed from CLOSED - CURRENTRELEASE to POST

- Sprint/Milestone deleted (3.6.1)

Setting back to POST just so I can merge the changes to plugin_template repo.
