Description

The automation needs to be disabled using the `template_config.yaml` and by re-running the plugin-template.

As part of this task, documentation needs to be added that references pulpcore documentation about cherry-picking process.

History

#1 - 08/05/2020 03:46 PM - dkliban@redhat.com

- Description updated

#2 - 08/12/2020 10:07 AM - mdellweg

The process itself has been deactivated already.

The docs for backport-requests will arrive with pulpcore 3.6.

Also i'd like to see this as part of the plugin template.
