Description

new bindings send a default checksum type when creating a publication.

Previously the 3.4 ruby bindings when creating a publication resulted in a publication request body of:

```
{"repository_version":"/pulp/api/v3/repositories/rpm/rpm/03b20f89-a2a3-4a02-8ea5-9af641623d15/versions/0/"}
```

after updating to pulp_rpm_client (3.6.0.dev01596557138), we now get a request body of:

```
{"repository_version":"/pulp/api/v3/repositories/rpm/rpm/7fcae337-d94c-4422-bd35-295943f48533/versions/0/","metadata_checksum_type":"sha256","package_checksum_type":"sha256"}
```

This might be fine, but i wanted to make sure it was intentional.

History

#1 - 08/05/2020 08:09 PM - jsherril@redhat.com

and to be clear, this is not an issue necessarily and this issue can be closed if the change is decided to be expected

#2 - 08/27/2020 05:28 PM - ttereshc

- Triaged changed from No to Yes

- Sprint set to Sprint 80

Adding to the sprint for the investigation.

#3 - 09/04/2020 05:24 PM - rchan

- Sprint changed from Sprint 80 to Sprint 81

#4 - 09/18/2020 09:29 PM - rchan

- Sprint changed from Sprint 81 to Sprint 82

#5 - 10/02/2020 01:58 PM - ttereshc

- Sprint deleted (Sprint 82)
