Description

Hey, are there and are there docs for Docker Notary / TUF features?

From <https://twitter.com/westurner/status/1299542433106202625> ::

#DockerNotary (#TUF) is justified and necessary because container images sidestep normal OS package integrity verifications (with e.g. GPG) and nobody runs debsums or rpm --verify on images they're trusting with all of their ops. "Trusted Install Media"

https://docs.docker.com/notary/getting_started/

<https://github.com/theupdateframework/specification/blob/master/tuf-spec.md>

[https://en.wikipedia.org/wiki/The_Update_Framework_\(TUF\)](https://en.wikipedia.org/wiki/The_Update_Framework_(TUF))

(FWIU, [#6871](#) is also an opportunity for better security.)
