

Pulp - Issue #746

API - update a repository with invalid importer config returns 404 and misleading error

03/10/2015 08:29 PM - amacdona@redhat.com

Status: CLOSED - WONTFIX	Start date:
Priority: Normal	Due date:
Assignee:	Estimated time: 0:00 hour
Category:	
Sprint/Milestone:	
Severity: 1. Low	Groomed: No
Version:	Sprint Candidate: No
Platform Release:	Tags: Pulp 2
OS:	Sprint:
Triaged: Yes	Quarter:

Description

Description

Response implies that the repo_id is not found, when it is actually the importer_config that is causing the problem. Since this data was passed in the body rather than the url, this should be a 400 and the importer_config should be the invalid param.

Steps to reproduce

test4 is a valid repository

```
curl -s -H "Accept: application/json" -H "WebFrameworkSwitch: webpy" -X PUT -d '{"importer_config": {}}' -D- -k -u admin:admin https://localhost/pulp/api/v2/repositories/test4/
```

```
HTTP/1.1 404 Not Found
Date: Tue, 10 Mar 2015 18:50:38 GMT
Server: Apache/2.4.10 (Fedora) OpenSSL/1.0.1k-fips mod_wsgi/4.3.2 Python/2.7.8
Content-Encoding: utf-8
Content-Length: 385
Content-Type: application/json
```

```
{"http_request_method": "PUT", "exception": null, "error_message": "Missing resource(s): resource_id=test4", "_href": "/pulp/api/v2/repositories/test4/", "http_status": 404, "error": {"code": "PLP0009", "data": {"resources": {"resource_id": "test4"}}, "description": "Missing resource(s): resource_id=test4", "sub_errors": [], "traceback": null, "resources": {"resource_id": "test4"}}
```

This problem will be unaffected by the Django work because it occurs in the manager:
<https://github.com/pulp/pulp/blob/master/server/pulp/server/managers/repo/importer.py#L250>
