**Description**

<https://docs.pulpproject.org/pulpcore/en/master/nightly/contributing/dev-setup.html>

Feedback from Gerrod:

I think setting up the pulplift environment is really easy but maybe there should be more info on interacting with elements in the environment like how it's useful to add port tunnels for 24817, 24816 on the vagrant ssh or more info about useful commands inside the environment like 'phelp, pbindings, etc..'
