

## Ansible Plugin - Issue #7512

Seeing some collections skipped with CollectionRemote with requirements.yml (related to [https://github.com/ansible/galaxy\\_ng/issues/437](https://github.com/ansible/galaxy_ng/issues/437))

### Description

This is kind of asking for a consult on [https://github.com/ansible/galaxy\\_ng/issues/437](https://github.com/ansible/galaxy_ng/issues/437)

When testing standalone automation-hub that is setup for a remote that points to "community" (<https://galaxy.ansible.com>) when trying to sync with a remote that has a "requirements\_file" specified, sometimes some collections are synced but others are ignored, seemingly with no errors.

The comments at [https://github.com/ansible/galaxy\\_ng/issues/437](https://github.com/ansible/galaxy_ng/issues/437) have more examples.

The current hypothesis is that it may just be malformed requirements.yml causing parts to be ignored.

But I'm looking for any other ideas that may need to be investigated.
