

Pulp - Issue #7543

"reserved_resources_record" missing from tasks (python client)

09/22/2020 12:55 PM - wibbit

Status:	CLOSED - DUPLICATE	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:		Groomed:	No
Sprint/Milestone:		Sprint Candidate:	No
Severity:	2. Medium	Tags:	API Bindings
Version:		Sprint:	
Platform Release:		Quarter:	
OS:	RHEL 7		
Triaged:	No		
Description			
When performing a <code>.read(task_href="")</code> using the python client, no "reserved_resources_record" is present, making it impossible to track down which publisher a task was associated with via the python client.			
<pre>>>> tasks.read(task_href='/pulp/api/v3/tasks/1d713b51-22db-4582-bd13-88da822cd91f/') {'child_tasks': [], 'created_resources': [None], 'error': None, 'finished_at': datetime.datetime(2020, 9, 18, 8, 57, 11, 669495, tzinfo=tzutc()), 'name': 'pulp_rpm.app.tasks.publishing.publish', 'parent_task': None, 'progress_reports': [], 'pulp_created': datetime.datetime(2020, 9, 18, 8, 57, 11, 387721, tzinfo=tzutc()), 'pulp_href': '/pulp/api/v3/tasks/1d713b51-22db-4582-bd13-88da822cd91f/', 'started_at': datetime.datetime(2020, 9, 18, 8, 57, 11, 474496, tzinfo=tzutc()), 'state': 'completed', 'task_group': None, 'worker': '/pulp/api/v3/workers/2ab4deb9-897e-43d4-9cdf-a6f95cf8f4e5/'}</pre>
