Description

Dear team, Two improvement requests for the Ansible installer :

- For technical reasons I have to change the http port on Nginx. I see this parameter is not customizable (80 is hardcoded in the nginx.conf.j2 template). Currently I change it manually in nginx.conf after each pulp_installer run. Would it be possible to make the http port customizable in the playbook ?
- Would it be possible to add a customizable variable to create more than 2 workers when running pulp_installer ?

Thanks a lot

History

- Tracker changed from Issue to Story
- % Done set to 0
- Severity deleted (2. Medium)
- Version deleted (3.3.1)
- OS deleted (RHEL 7)
- Triaged deleted (No)
- Groomed changed from No to Yes
- Quarter set to Q4-2020
- Tags Easy Fix added

#2 - 04/20/2021 03:44 PM - daviddavis

- Quarter changed from Q4-2020 to Q2-2021

#3 - 04/20/2021 03:48 PM - fao89

About the workers you can use these variables:

```
pulp_workers: 4
pulp_api_workers: 4
```

About the port, I'll be working on that

#4 - 04/20/2021 09:06 PM - fao89

- Status changed from NEW to CLOSED - WORKSFORME

actually it was already implemented:

https://github.com/pulp/pulp_installer/blob/master/roles/pulp_webserver/defaults/main.yml#L16-L17

```
pulp_webserver_http_port: 80
pulp_webserver_https_port: 443
```
