Description

We often specify \$REPO_HREF two times in the same call, e.g.:

- https://github.com/pulp/pulp_container/blob/fb4fe8c00406cc93b950449b8cbff64eeee7d2da/docs/_scripts/image_tagging.sh#L7-L8
- https://github.com/pulp/pulp_container/blob/fb4fe8c00406cc93b950449b8cbff64eeee7d2da/docs/_scripts/tag_copy.sh#L4-L5 (I am confused how to use the copy API in general due to this)

This was changed in https://github.com/pulp/pulp_container/commit/49a78cf6c1476643335096116ca48724c35ac421. The solution would be to update the calls to properly follow the current workflows.
