As a user, I have artifacts compliant with the allowed checksums.

Enabled users to add/remove checksums to ALLOWED_CONTENT_CHECKSUMS. Added check for forbidden checksums. Added command to handle artifacts with missing and forbidden checksums.

This command would have to bypass the ALLOWED_CONTENT_CHECKSUMS check[0]. The problem is that this check will run BEFORE the command. So what we'll probably want to do is check `sys.argv[1]` against the command name and if it matches, bypass this check.
