

Pulp - Issue #7641

Task # 7638 (NEW): Fix ansible_python_interpreter issues in pulp_installer

pulp_installer role READMEs should not tell users to set ansible_python_interpreter

10/01/2020 08:17 PM - mdepaulo@redhat.com

Description

Multiple roles' README.md files list under variables:

```
ansible_python_interpreter` : Required. Path to the Python interpreter.
```

It definitely isn't required to be set, since the default behavior is auto_legacy in Ansible 2.8 through 2.11, and auto in 2.12 (planned.)

Furthermore, we probably shouldn't even list it. It is a common built-in Ansible variable that. There are many others, and there seems to be nothing special about it. Perhaps we should list it in case users are running Fedora 30.
