Platform Release:	Sprint:
Target Release - Debian:	Quarter:
Groomed: No	
Sprint Candidate: No	

Description

pulp_rpm provides a special API endpoint for advanced copy operations with dependency resolution:
<https://pulp-rpm.readthedocs.io/en/latest/workflows/copy.html#advanced-copy-workflow>

Since APT packages have dependencies of similar complexity to RPM packages, pulp_deb users could benefit from an analogous feature.

The Katello repo filtering mechanism presumably requires this feature.
