**Description**

I want to remove auth\_url from my remote, but I can't because when I submit "auth\_url": null, the server responds with a validation error.

PUT

```
{
  "auth_url": null,
  "url": "https://alaxy.ansible.com/api/v2/collections/",
  "name": "Community",
}
```

Response: When specifying 'auth\_url' you must also specify 'token'.
