

RPM Support - Story #818

As a user, I can add multiple gpg keys to a repo

Description

Some upstream repos worth mirroring (notably Dell's OMSA repos) use multiple GPG keys. Syntax is supported for this in yum.conf, as well.

Pulp v1's `pulp-admin repo create` command has a `--gpgkeys` option, which functions, but pulp 2.6's `pulp-admin rpm repo create` gpg option is singular `--gpgkey`. Looking at code it does not appear to support multiple.

This feature would be nice to have, and would reduce hoop-jumping and hacks required to get mirroring of external repos using multiple GPG keys working.

History

#1 - 03/31/2015 05:14 PM - mhrivnak

- Tracker changed from Issue to Story
- Project changed from Pulp to RPM Support
- Subject changed from Add support for multiple gpg keys per repo to As a user, I can add multiple gpg keys to a repo

#2 - 09/25/2015 07:08 PM - chadpritchett

+1

Would like to have this feature in Katello, and I believe Pulp supporting it would be a pre-req.
