## History

---

### #1 - 02/23/2021 05:36 PM - alikins

Would it be possible to get a little further back in the log?

Mainly looking for the name of the collection artifact that triggers this?

### #2 - 02/24/2021 10:43 PM - gerrod

Looking through the database, there are two collection versions that don't have FILES.json. Both under namespace hs0210, fos 1.0.1 and tos 1.0.0 are missing their FILES.json.

### #3 - 03/01/2021 09:35 PM - newswangerd

That's sort of worrying. Those versions were uploaded recently (within the last 2 months). This makes me think we're not properly validating collections at import time.

### #4 - 03/02/2021 05:58 PM - awcrosby

We created an issue to validate FILES.json within galaxy-importer: <https://issues.redhat.com/browse/AAH-403>
