

Pulp - Issue #8518

Can't browse rpm repo listing

04/07/2021 08:42 AM - adam.winberg@smhi.se

Status:	CLOSED - DUPLICATE	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour

Triaged:	Yes	Quarter:	
Description			
<p>After updating from pulpcore 3.9 to 3.11 I can no longer browse the list of repositories in Pulp. Trying to access '/pulp/content/' results in a 500 error with following error from pulpcore-content service:</p>			
<pre>[2021-04-07 06:14:26 +0000] [2135216] [ERROR] Error handling request Traceback (most recent call last): File "/usr/lib64/python3.6/site-packages/aiohttp/web_protocol.py", line 422, in _handle_request resp = await self._request_handler(request) File "/usr/lib64/python3.6/site-packages/aiohttp/web_app.py", line 499, in _handle resp = await handler(request) File "/usr/lib/python3.6/site-packages/pulpcore/content/handler.py", line 121, in list_distributions directory_list = [{"}/".format(d.base_path) for d in base_paths] File "/usr/lib/python3.6/site-packages/pulpcore/content/handler.py", line 121, in <listcomp> directory_list = [{"}/".format(d.base_path) for d in base_paths] AttributeError: 'str' object has no attribute 'base_path'</pre>			
<p>Access to the repository publications/distributions are working fine, so this is more of a cosmetic problem for me, also I have built some tooling and monitoring relying on being able to list and browse repos via web browser.</p>			
<p>Is this an expected behaviour? I couldn't find anything in the release notes but I might be missing something.</p>			
<p>Using:</p>			
<pre>python3-pulp-rpm-3.9.1-1.el8.noarch python3-pulpcore-3.11.0-1.el8.noarch</pre>
