

RPM Support - Story #8523

When syncing content from a remote, GPG signatures are checked

04/07/2021 11:24 PM - cottsay

Status: CLOSED - DUPLICATE	Start date:

Groomed: No	Quarter:
Sprint Candidate: No	
Description	
As it stands, the remote repository sync process makes no effort to verify the GPG signature of packages or metadata in the remote repository. RPM repositories can sign the repository metadata, the individual packages, or both.
