

Pulp - Story #8554

Provide easy task cleanup api

04/14/2021 02:29 AM - jsherril@redhat.com

Status:	CLOSED - CURRENTRELEASE	Start date:	
Priority:	Normal	Due date:	
Assignee:	ggainey	% Done:	100%
Category:		Estimated time:	0:00 hour
Sprint/Milestone:	3.17.0	Tags:	Katello
Platform Release:		Sprint:	
Groomed:	No	Quarter:	Q4-2021
Sprint Candidate:	No		
Description			
<p>Today a user of pulp would have to manually request all tasks using a filter and then manually trigger a delete for each one. It would be much simpler if we could simply call an API and trigger a task that would bulk delete all tasks matching some set of criteria such as:</p> <p>created before some date with states cancelled, completed, skipped</p> <p>I think somehow using a list query to delete those (such as being able to pass the href /pulp/api/v3/tasks?state__in=completed,skipped) would be pretty slick.</p>

for high volume installations with many tasks desiring to issue periodic cleanup routines, having a mechanism for bulk deletion will be ideal. Issuing thousands or millions of single delete API calls during a cleanup limits the ability to scale.
