<b>Description</b>			
Here is the example of the commit that is not being cherry-picked <a href="https://github.com/pulp/pulp_rpm/commit/2a0bfe655de04f915c8a301a44e046d3738ae1da">https://github.com/pulp/pulp_rpm/commit/2a0bfe655de04f915c8a301a44e046d3738ae1da</a>			
Cherry-pick script supports only fixes and closes keywords but not re or ref.			
The problem with adding those to the list of the keywords is that the pattern becomes too generic, especially re. And sed will match more than needed.			
The workaround is too cherry-pick manually, or add re and ref to the list of keywords and fix the commit message if there are extra subs made.			

#### History

#1 - 05/14/2021 04:46 PM - fao89

- Triaged changed from No to Yes

#2 - 06/18/2021 06:00 PM - davidDavis

- Status changed from NEW to CLOSED - DUPLICATE
