Sprint/Milestone:		Tags:	API Bindings
Platform Release:		Sprint:	
Groomed:	No	Quarter:	
Sprint Candidate:	No		

Description

With the current openapi generated python bindings, I can

- Use blocking REST calls with `async_req=False`
- Use a future-like model with `async_req=True`

Is there a way to use asyncio with the current bindings? If not, is it possible to generate the bindings with asyncio?
