

Pulp - Story #8846

As a pulp_installer user, I do not need to use the latest micro release to install the latest micro release of pulpcore

Description

Basically, this means that pulp_installer 3.14.0 (or possibly 3.13.1 / 3.13.2) will be able to install pulpcore 3.14.z .

The benefit for users is that they will not need to always have the latest micro version of pulp_installer.

And the benefit to the pulp team is that we will not need to do a pulp_installer micro release for every pulpcore micro release.

This is a variation of the 1 year old proposal for versions/branches in pulp_installer, and a variation of the specific micro release policy we implemented originally in [#5618](#).
