

Pulp - Task #8848

Story # 8846 (NEW): As a pulp_installer user, I do not need to use the latest micro release to install the latest micro release of pulpcore

pulp_installer to run CI against stable branches

06/01/2021 11:20 PM - mdepaulo@redhat.com

Sprint Candidate:	No		
Description			
Currently, the source molecule tests test the master branch of pulpcore and master branch of plugins, rather than the appropriate branches like pulpcore 3.11 and pulp_rpm 3.11			
So effectively we are relying on release jobs on old branches to catch errors, at release time.
