

## Pulp - Issue #8868

### Bindings don't properly namespace API

06/04/2021 06:14 PM - daviddavis

<b>Description</b>			
<p>The pulp exports API lives at endpoint <code>/api/v3/pulp/exporters/core/pulp/&lt;uuid&gt;/exports/</code>. For whatever reason, the bindings that get generated name this <code>ExportersCoreExportsApi</code> (see <a href="#">here</a>)</p> <p>I am adding a new export type (<code>FilesystemExport</code> at <code>/api/v3/pulp/exporters/core/filesystem/&lt;uuid&gt;/exports/</code>) and the bindings are adding two sets of methods to <code>ExportersCoreExportsApi</code> (e.g. <code>create</code> and <code>create_0</code>).</p> <p>I believe there should be some sort of namespace in there like <code>ExportersPulpExportsApi</code> or <code>ExportersCorePulpExportsApi</code>.</p>

#### Associated revisions

Revision 21494e17 - 06/24/2021 04:50 PM - dkliban@redhat.com

Fix OpenAPI schema tag generation

The tag generation code was deleting the second element from the end instead of deleting the second element in the list of operation keys. This worked for operations that had 3 elements in the operations keys list, however, anything longer produced wrong operation tags.

fixes: #8868 <https://pulp.plan.io/issues/8868>
