Description			
New style workers should mark themselves as offline in the database if shut down. Also on receiving a signal to shut down, the worker should wait for a small amount of time (1-30 s) until it's currently running task finishes before aborting it.

Graceful worker shutdown

When a worker receives a SIGINT (ctrl-c) or SIGTERM (systemd), it will wait a bit for it's task to finish before aborting it and removing itself from the worker table.
