Sprint Candidate:	No		

Description

The pulp-operator currently supports backup and restore via custom resources. The CI/CD pipeline should have a test that validates this continues to function.

Test steps:

- Install operator and create a Pulp custom resource
- Add content to Pulp (e.g. Ansible Collection)
- Create a backup by defining a PulpBackup custom resource
- Delete the previous Pulp custom resource to remove the Pulp instance
- Create a PulpRestore custom resource which will create a Pulp custom resource and restore the db and files
- Validate that the content is present in the "restored" Pulp instance

History

#1 - 09/22/2021 05:41 PM - fao89

- Category set to Operator

- Tags CI/CD added

#2 - 10/04/2021 10:38 PM - fao89

- Status changed from NEW to ASSIGNED

- Assignee set to fao89
