

Pulp - Story #9183

As a user, I can see the status (idle, working) of my workers

Description

It would be helpful if the worker API (and status API) should show the task currently executing on that worker, and/or state information such as "idle" / "working" for each worker.

It may also be a good idea for the status API to list the number of tasks currently queued up.

This would re-enable some of the functionality provided by the "rq info" and "qpid-stat" tools in the past.
