Description

Hello

We are installing a new pulp3 **docker container**. pulp "version": "3.14.2"

If I am at the wrong place to log this issue, please redirect me to the correct place as this is a first ever with pulp for me.

Creating publications for of 4 out of 5 repositories worked. one at version 0 (no content) three at version 1

The one repository at Version 2 is failing.

Attached are the docker log and the command output with vlag-vvv The top of the command log is output of repository list and publication list.

The content for the failing repository were updated to rev 2 yesterday

Failing command: pulp rpm publication create --repository "SLES12-SP5-Updates"

Failing publication: (info from log file) "latest_version_href":
"/pulp/api/v3/repositories/rpm/rpm/d04fd14e-fe1c-4638-8cf6-9a6a508224e2/versions/2/", "name": "SLES12-SP5-Updates",

Thank you so much for the help!!

#2 - 08/04/2021 12:07 AM - dalley

I'm about 90% certain that this is the same as <https://pulp.plan.io/issues/9174> which was fixed earlier today, so hopefully the next release (3.14.4 or 3.15.0) will resolve it.

- Is duplicate of Issue #9174: Cache invalidation code for publication delete triggers an error when no complete publication yet exists added

#4 - 08/04/2021 12:08 AM - dalley

I'll leave it open for now because I'm not 100% certain :)

#5 - 08/04/2021 09:10 AM - janr7

Hi, this is such good news.

It would be really appreciated for 3.14.4 to help us move on quicker. Are there a way to watch/follow the ETA for the fix?

Thank you once more.

- *Status changed from NEW to CLOSED - WORKSFORME*

@janr7 pulpcore 3.14.4 is now released, and the image should now be updated as well. Let me know whether this fixes your issue!

#9 - 08/11/2021 05:13 PM - janr7

Hello dalley, 3.14.4 is working just fine.

Thanks you so much. Appreciated.
