

Container Support - Issue #9403

Pulp container does not validate container distribution base paths

09/15/2021 09:00 PM - newswangerd

Status:	CLOSED - CURRENTRELEASE	Start date:	
Priority:	Normal	Due date:	
Assignee:	lmjachky	Estimated time:	0:00 hour
Category:		Sprint Candidate:	No
Sprint/Milestone:	2.9.0	Tags:	
Severity:	2. Medium	Sprint:	Sprint 106
Platform Release:		Quarter:	
OS:			
Triaged:	Yes		
Groomed:	No		
Description			
Container distribution base paths are supposed to be a valid container repository names, however, the container distribution serializer doesn't validate for this aside from verifying the container namespace in the base path. Right now users can create distributions with names like i/am/an/very:bad:container/name.py, which breaks the registry in Automation Hub.
