

RPM Support - Issue #960

Issue # 1210 (CLOSED - CURRENTRELEASE): ConnectionError - BadStatusLine during repo sync

Sync sometimes fetches partial files

05/07/2015 08:50 PM - mhrivnak

Status:	CLOSED - DUPLICATE	Start date:	
Priority:	High	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:		Groomed:	No
Sprint/Milestone:		Sprint Candidate:	No
Severity:	2. Medium	Tags:	Pulp 2
Version:	2.6 Beta	Sprint:	
Platform Release:		Quarter:	
OS:	RHEL 6		
Triaged:	Yes		

Description

Rephrased from a downstream bug...

If you sync ~50GB of packages (RHEL 6 + RHEV 3.5)

- on some runs, everything syncs successfully, yet it's fairly common to see a sync error in the RHEVM repo.

- I've seen errors with the below packages this week:

jasperreports-server-pro, "expected_size"=>473115020, "actual_size"=>312700

rhev-guest-tools-iso, 'expected_size': 261383164, 'actual_size': 88080384

- a re-sync is successful

Example error:

```
{ "expected_size"=>119814460,
  "error_code"=>"size_mismatch",
  "actual_size"=>1110812,
  "unit_key"=>
  { "name"=>"rhev-webadmin-portal",
    "checksum"=>"fbfa34e6cf6dc4259bc02dacb41c9a40cf88e3cf",
    "epoch"=>"0",
    "version"=>"3.5.0",
    "release"=>"0.32.el6ev",
    "arch"=>"noarch",
    "checksumtype"=>"sha1"}}
```

So somehow it looks like a download is not failing during the transfer when it probably should. It finishes getting an HTTP response, tries to validate the file it got, and the file is too small. If the transfer were interrupted, I would expect to see a connection error of some kind.

History

#1 - 09/01/2015 11:29 AM - ipanova@redhat.com

- Status changed from NEW to CLOSED - DUPLICATE

- Parent task set to #1210

I think this a dup of [#1210](#)
